

A Life-Changing Career

Pharmacy Residency Programs

Mayo Clinic School of Health Sciences

World Renowned Care

As part of one of the largest, most advanced integrated health care organizations in the world, Mayo Clinic and Mayo Clinic Health System offer exceptional pharmacy residency training programs. Pharmacy residents work side by side with world-class pharmacists, providers, scientists, and allied health staff who have a single, unified vision: the needs of the patient come first. Within Mayo Clinic's state-of-the-art facilities and through its unparalleled resources and mentorship from some of the most highly regarded clinicians in the profession, resident graduates can transform pharmacy practice.

Advanced PGY1 and PGY2 Training

Mayo Clinic's three interlocked shields symbolize patient care, research, and education. Each program's curriculum is designed to provide high-quality experiences in each of these areas, with the goal of developing a well-rounded, fully competent clinician. Through seamless integration into the interdisciplinary team, residents provide advanced pharmaceutical care to a multitude of patient populations. Learning experiences include personalized instruction and guidance as the resident learns to treat a wide spectrum of diseases, from the common to the very rare.

A breadth of program-specific required and elective learning experiences is tailored to the individual resident. In addition to comprehensive program-specific training as a member of the interdisciplinary team, residents are afforded countless learning opportunities regardless of location, including but not limited to

- Advanced life support training and emergency response
- Continuing education presentations
- Leadership and practice development
- Patient care in a variety of settings
- Quality improvement training
- Research project
- Teaching and preceptor opportunities

Pharmacy Residencies at Mayo Clinic

ADMISSIONS

Mayo Clinic utilizes the Pharmacy Online Residency Centralized Application Service (PhORCAS)

Applications and all supporting documents are due by Jan. 1 of the year you wish to begin a program.

Your application must contain these materials, all of which must be uploaded to PhORCAS:

- Official transcripts from your college of pharmacy.
- Curriculum vitae.
- One-page letter of intent.
- A PhORCAS standardized reference form must be completed and submitted via PhORCAS by three references of your choosing.

All candidates must also register with the ASHP Resident Matching Program, which makes all appointments. Match results are released in late March.

STIPEND AND BENEFITS

- \$48,000 for PGY-1 residents
- \$51,000 for PGY-2 residents
- 15 total days of paid time off for personal vacation (including professional interviews), holidays, and sick leave.
- Professional meeting attendance (ASHP Midyear Clinical Meeting, Florida Residency Conference)
- Academic advising/tutoring
- Employee assistance program (counseling)
