

Florida Diabetes Camp

Come Volunteer with Us!

About Florida Diabetes Camp

All Florida Diabetes Camp programs are open to any child with type 1 diabetes, and while attending camp they are under the direct supervision of pediatric endocrinologists from around the state who volunteer at various programs. Campers are placed in cabins according to age/grade/sex and have trained counselors accompanying them 24 hours a day. All camps feature a variety of land and water activities as well as age appropriate diabetes education.

Why to Volunteer With our Camp

By volunteering at our camp, you will have a once in a lifetime opportunity to immerse yourself into a joined community of medical professionals and passionate staff focused to improve children and youth with diabetes social interactions and medical care. This is also a great opportunity for patient care hours for medical, nursing, pharmacist, and physician assistant students. Additional opportunities include fellowships with camp doctors.

Roles to Fulfill

- Cabin counselors
- Lifeguard/ Recreational Staff
- Camp Doctors, Nurses, and Fellows
- Diabetes Camp Educators/Nurses

Skills Gained

- In depth knowledge of Type 1 Diabetes medical management.
- Interpersonal and communication skills with other camp staff, families and children.
- Provide compassionate care in the pediatric context to improve medical abilities in your own occupation.
- Incomparable hands-on patient care hours for medical profession school applications.
