

Medical Communications (Digital Strategy & Innovation) Intern

About Servier Pharmaceuticals

At Servier Pharmaceuticals, we are dedicated to bringing the promise of tomorrow to the patients we serve. We are a commercial stage, privately held pharmaceutical company, based in the U.S. Currently, we have four medicines approved in acute lymphoblastic leukemia (ALL), acute myeloid leukemia (AML) and cholangiocarcinoma (CCA). We have also accelerated our investment in hard-to-treat cancers, with more than 50% of our research and development dedicated to delivering significant advances in areas of high unmet need that may truly move the needle for our patients. Our pipeline is promising with several Phase 3 assets in the Oncology space.

Role Summary

This individual will support the US Scientific Communications team on a wide range of digital tactics to support product launch readiness, data dissemination, and disease state education. They will have the opportunity to learn more about the oncology therapeutic area and the Scientific Communications role. Furthermore, the individual will gain exposure to other functional areas within Medical Affairs.

Primary Responsibilities

- Learn about the role and responsibilities of Scientific Communications, including learning and applying the processes and industry standards that govern medical communications
- Work independently and collaboratively with internal stakeholders and vendors to create and manage content across Servier US Medical Affairs digital channels (website copy, social media posts) for health care professionals (HCPs)
- Monitor and report metrics across channels, providing insights and recommendations for optimization
- Conduct research on industry trends and best practices to identify new opportunities and inform US Medical Affairs digital strategy
- Assist in the development of other medical and scientific resources (e.g., slide decks on disease state or clinical trial data) for health care professionals (HCPs) and internal training
- Engage with US Medical colleagues to understand the various roles and responsibilities within Medical Affairs (e.g. Publications, Field Medical, Medical Strategy, Medical Information, Pharmacovigilance), with the opportunity to support ongoing projects aligned with their interests

Education and Required Skills

- Must be enrolled in an accredited college or university pursuing a PharmD, PhD, or Master's program in a science-related field and have completed at least 1 year of their graduate program
 - Must have completed P2 year and/or oncology coursework if pursuing PharmD
- Experience performing PubMed searches, reading, and critically evaluating primary scientific literature
- Familiarity with cancer biology and targeted therapeutics in oncology is beneficial
- Passion for translating scientific data into accessible, short-form or visual content. Experience with content creation, social media platforms and management is beneficial
- Excellent interpersonal, oral, and written communication and presentation skills
- Highly motivated, results-oriented individual with the flexibility and organizational skills to manage multiple projects in a fast-paced environment
- Consistent demonstration and embodiment of our company core values: Care, Dare to Innovate, Commit to Succeed, and Grow by Sharing

Travel and Location

- This position can be Boston-based or completed remotely
- If remote, there may be an opportunity for infrequent travel to the Boston office (<10%), based on discussion with manager

Servier's Commitment

We're an organization, committed to modeling diversity, equity, and inclusion for the entire industry, and to maintaining an inclusive environment with equitable treatment for all. We are interested in growing our team with passionate, committed, and innovative individuals. We encourage all to apply to our open roles and are always willing to consider skills and experiences outside of what is listed in the job description.
